DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim 26 is objected to because of the following informalities: "apices" is misspelled as "apieces. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 27 recites the limitation "one of the plurality of frames attached to the first end of the graft". There is insufficient antecedent basis for this limitation in the claim. Furthermore, one might interpret the claim such that there is a plurality of frames at the first end of the graft.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-25, and 27-31 are rejected under 35 U.S.C. 102(b) as being anticipated by Rhodes (5,122,154). Rhodes discloses a graft comprising: a plurality of discrete non-overlapping self-expanding frames (30) along its length, which may be inside the graft (col. 4, lines 19-22), and have wall engaging members (Col. 7, lines 18-30), and wherein the graft is pleated, which may provide a tapered profile (Fig. 6). Please Note: The Applicant may have meant to claim the graft as tapered after full expansion.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhodes (5,122,154) in view of Lazarus et al. (5,275,622) as cited in Applicant's IDS. Lazarus et al. discloses a graft comprising a plurality of frames extending beyond the length of the graft, the frames having a helix configured at their apices, however Lazarus et al. fails to disclose the frames along the length of the graft. Rhodes teaches discrete frames along the length of the graft (Fig.7), which adds strength and flexibility,

enabling the use of a longer graft (col. 3, lines 47-52). It would have been obvious to one of ordinary skill in the art to combine the teaching of discrete frames along the length of the graft, as taught by Rhodes, to a graft comprising a plurality of frames extending beyond the length of the graft as per Lazarus et al., in order to add strength and flexibility to the graft, enabling the use of a longer graft.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (703) 308-8295. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.
